Date: Wednesday, May 22, 2013 7:02:43 PM

John, thank you for the email and notice. I do want to clarify one item. ATF is not releasing the scene to Crane Engineering. The State Fire Marshal's Office (SFMO) obtained a State Search Warrant, ATF was working with the SFMO in a unified command structure. One of ATF's responsibilities was at the site on a daily basis along with other investigative responsibilities outside of the site. Therefore, the SFMO will be releasing the site to the owner's (or their representative) and then returning their search warrant. So if you could have for Friday morning at 8:00 am a letter stating that you are the attorney of record for the owners and stating for the SFMO that you want the scene turned over to Crane Engineering.

See you guys on Friday morning at 8:00 am, so this should confirm to all of you the release date of Friday, May 24, 2013.

Brian

All,

Since the time for site control transfer is fast approaching I am sending via e-mail a copy of the proposed protocol for the first site inspection once it is transferred to Crane Engineering by ATF. As you all know Crane is the independent site control manger that has been hired to deal with the inspection after ATF releases the site. This will be provided to all interested parties that indicate a desire to attend the inspection following release of the site by ATF.

Since most of the recipients of this e-mail will be on one of two conference calls tomorrow about the site control and ATF is on this e-mail so they can coordinate with Crane Engineering a seamless site transfer I am sending this for your edification. I think the plan is a good one.

Obviously, the dates will be changed. We think the meeting will still be in the same location. If we get access on this Friday I have heard from some we should give 3-5 days notice. We could shoot for next

9496707

Wednesday as day one of the inspection. This would require calls, e-mails on Friday to get all interested parties on notice.

Given it is a Holiday Weekend the earlier we know Friday the better.

John
